

ABSTRACT OF THE DISCLOSURE

09/505119

5 The angle and distance device includes a longitudinally and laterally rigid extendable tape that can be extended from a central point and that has an edge that facilitates reliably marking on the stationary member to form an accurate template as the angle and distance device is rotated and the tape is extended and retracted to critical features of an area.

1. The first part of the report is a general introduction to the project, which includes the objectives, scope, and methodology.
